<b>L03</b>	Walloon	Walloon station is one of the original stations on the line from Ipswich to Grandchester and was opened at the same time as the railway line was in 1865, to service a small rural community, since this time the railway line has been extended to out west and also to Brisbane, much has changed. in its earlier days it would have been a busy station as the area had mixed farming and dairying and even had a small butter factory. Coal was also discovered about a kilometre to the north in 1881 and a tramway was built to bring the coal to the station. The layout has been set in the period of the 60's to the 80's with steam slowly being replaced by diesel locomotives, the area around the station is generally farm land with a few buildings like the station Masters	0418197068 <a href="mailto:secretary@ldmrc.com">secretary@ldmrc.com</a> . <a href="http://www.ldmrc.com">www.ldmrc.com</a>

<b>L07</b>	The Wayne Branch	A number of Queensland members of the NMRA are constructing a display layout, with scenery based on the mid-west of the USA. The formal name of the group is the National Model Railroad Division 1 Module SIG, but at one of the formation meetings of the group held in 2004, the name Wayne Branch was adopted as the name for the layout. The layout and rolling stock is HO, built to NMRA Standards and uses the DCC system of train control using a NCE power station and controllers. The individual locomotives are fitted with control chips from a variety of manufacturers. Some locomotives have sound chips installed for added realism. Kadee couplers are used. <b>L12</b>	Broxburn Sidings	Broxburn Sidings is a OO Shelf type shunting layout, representing a private railway company. Features include remote uncoupling of wagons allowing prototypical shunting operations to take place. The wagon couplings are made from wire to the "AJ" system. Scenery ia scratch built incorporating micro LED Lighting .		
<b>L13</b>	Urangan Pier	Urangan Pier built 1917 with the late train about 1988. This is working replica of the Pier at Harvey Bay as I remember it in the 70s	For info 0732657138	

L14	Garden City Central	The layout is the work of the Toowoomba Model Railway Club Inc..The decision to base the layout on Toowoomba is logical, given that the club is based at the Toowoomba Showgrounds and the Toowoomba Railway station is a prominent heritage landmark. Toowoomba railway station is the centrepiece of the layout, with Grand Central shopping centre nearby and other features include Laurel Bank Park, DownsSteam, the former Defiance Flour Mill, the Spotted Cow & Norville hotels, and The Royal Bulls Head Inn. All the buildings have been scratch built using cardboard and paper only. The arrangement of the railway tracks on the layout has been modified slightly from the actual track configuration to allow more frequent running of trains. The buildings and trains are built to HO scale and the track gauge is 12mm which closely represents the Queensland Railways gauge of 1067mm. L27	South Pine	South Pine is a new modular layout built by the Railway Model Club of Queensland to cater for the exhibition needs of our members. The layout is designed to run DCC locomotives, and while it has a basic Australian look and feel, trains from all around the world, in particular the US and Europe can be seen. It is based on an industrial area with passing loops, engine facilities and some local industries. This allows trains to be always on display with continuous operation on the mainline or shunting in a siding or loco area. Some of the industries or commercial premises displayed are strong supporters of our club. The layout is transported in a purposely designed trailer to ensure protection and only needs one member to transport. L28	Pine Rivers	PINE RIVERS is an N scale modular layout loosely based on the NTRAK standards. This layout, by the Railway Modeller's Club of Queensland Inc, is always being modified and this year includes a Point to Point Tourist railway, fully controlled automatically with a DCC shuttle from the UK. The visiting Circus is still in town as well as the Sporting Complex for Tennis, Swimming and Basketball. A fully DCC controlled Industrial area has been developed to help support the existing Wheat Loading Silos and Light Industries with rail services. Points in this area are activated by slow motion servos controlled by DCC throttles. The Housing Estate continues to grow and is getting closer to occupation. All this surrounds the Canyon River Scene with its Township. We control our layout with an NCE DCC system connected to a laptop computer and wireless interface so that we can drive our trains via our mobile phones and tablets.
